Academic Projects:

Project: File Sharing Using Email (Dec 2020 - Feb 2021) /College
Team Size: 3
Description: I have created a mock-up of a file sharer system. It is a web application in which I have used PHP for backend and jQuery, html, and CSS for frontend, so all it needs a browser and connection to run. It consists of a front-end, from which you could upload file and share with your friends and family, assign users who can get the file in their email. All the data is stored in the SQL database. I use XAMPP server to run the PHP code using the Apache server in it and the database that comes with it. Email sends by SMTP server when we hit the send file button.

Education:

Bachelor Computer Application, 2019 - 2022
Z.B Patil Collage, Dhule **CGPA: 8.88**

HSC Maharashtra Board - 2019
